Dear Ms. La Donna Castaneda
Elected Official

The purpose of this letter is to express my **OPPOSITION** to the expansion of the landfill owned by BFI/Allied Waste location at 5757 Oats Road off McCarty Road. As a concerned citizen I am **OPPOSED** to the expansion of the landfill because of the health and safety problems it is creating in the northeast community.

I am asking you to support the community's efforts to stop the issuance of a expansion permit by contacting the Texas Commission on Environmental Quality (TCEQ) expressing your support for the community's opposition as well.

Please help us address this problem and return our community to a safe place to live and work.

I need your help and support as soon as possible. I look forward to your response.

Sincerely,

Matthe Johnson

Dear Ms. Castanula:

BY KY

The purpose of this letter is to express my **OPPOSITION** to the expansion of the landfill owned by BFI/Allied Waste location at 5757 Oats Road off McCarty Road. As a concerned citizen I am **OPPOSED** to the expansion of the landfill because of the health and safety problems it is creating in the northeast community.

I am asking you to support the community's efforts to stop the issuance of a expansion permit by contacting the Texas Commission on Environmental Quality (TCEQ) expressing your support for the community's opposition as well.

Please help us address this problem and return our community to a safe place to live and work.

I need your help and support as soon as possible. I look forward to your response.

Sincerely,

Phylav

Comments on MSW Permit Amendment No. 261B
McCarty Road Landfill TX, LP
5757A Oates Road, Houston, TX

CHIEF CLERKS OFFICE

2004 DEC - 1 PM 3:22

TEXAS
COMMISSION
ON ENVIRONMENTAL
QUALITY

Dear Sir:

In accordance with your public meeting announcement and the laws and regulations of the state of Texas, I am submitting near with my official comments to the proposed permit amendment No. 261B by McCarty Road Landfill TX.

1. There is no source for cover material soils within the permit boundaries. What is the source of soil and does the traffic study include trucks transporting soil to the facility?
2. The Green Bayou watershed has been revised by HCFCD. Construction permits may no longer be issued under the prior watershed parameters. The hydrology study no longer complies with local requirements. Please explain how a permit will be issued?
3. The proposed landfill design reaches an elevation beyond any prior landfill designs for the area. There is inadequate soil and liner site-specific test information to assure proper stability analyses. Please justify the parameters selected. Please justify the critical failure surfaces presented. It is impossible to know the soil strength parameters in areas without quality control at the waste-soil interface. Please justify your selections.
4. It is impossible for the Executive Director to issue a permit for the proposed amendment that complies with Draft Permit Condition IIIB stating, "The entire waste management facility shall be designed, constructed, operated, and maintained to prevent the release and mitigation of any waste, contaminant, or pollutant beyond the point of compliance as defined in 30 TAC 330.2. The landfill is currently polluting the groundwater as evidenced by the Corrective Measures Assessment. Even if remediation activity is beginning to "Clean-up" groundwater, capping of the non-subtitle areas must begin immediately. Please explain why placing an additional 35 million compacted cubic yards of MSW on this landfill will not provide additional infiltration resulting in continued polluting.

5. Clearly the proponent is attempting to circumvent the spirit of Subtitle D by requesting a vertical expansion with 86 percent of the area not having Subtitle D liner. The landfill is projected to close 20 years after Subtitle D implementation. Please explain how TCEQ is protecting the environment by allowing the proponent to vertically expand over a non-subtitle D area with groundwater problems.
6. Please explain where the unfiltered ground water test results are in the amendment. The owner must have been testing unfiltered ground water samples since at least the Corrective Measures Assessment as TCEQ has no authority to issue a filter variance on "assessment constituents," Appendix II to 40 Code of Federal Regulation Part 258.
7. Please explain how the presented equipment dedicated to the McCarty Road Landfill will be capable of handling 6000 tons of waste per day in an environmentally sound manner.
8. The current gas collection and control system is inadequate to control migration of landfill gas. Seven existing gas probes have shown methane levels above the regulatory limit. Please explain why all extraction wells are not being replaced as part of this amendment so that well perforations run the entire thickness of the waste. Also, please explain how placing up to 128 feet of additional waste on the landfill will not negatively impact gas extraction. In addition please explain how much ground water pollution is occurring because of methane migration particularly from "light" organic compounds.

Please place me on the mailing list for this permit amendment. My mailing address is:
P. O. Box 692132, Houston, Texas 77269-2132.

Sincerely,

Mark Sweeney

Comments on MSW Permit Amendment No. 261B
McCarty Road Landfill TX, LP
5757A Oates Road, Houston, TX

Dear Sir:

In accordance with your public meeting announcement and the laws and regulations of the state of Texas, I am submitting near with my official comments to the proposed permit amendment No. 261B by McCarty Road Landfill TX.

1. There is no source for cover material soils within the permit boundaries. What is the source of soil and does the traffic study include trucks transporting soil to the facility?
2. The Green Bayou watershed has been revised by HCFCD. Construction permits may no longer be issued under the prior watershed parameters. The hydrology study no longer complies with local requirements. Please explain how a permit will be issued?
3. The proposed landfill design reaches an elevation beyond any prior landfill designs for the area. There is inadequate soil and liner site-specific test information to assure proper stability analyses. Please justify the parameters selected. Please justify the critical failure surfaces presented. It is impossible to know the soil strength parameters in areas without quality control at the waste-soil interface. Please justify your selections.
4. It is impossible for the Executive Director to issue a permit for the proposed amendment that complies with Draft Permit Condition IIIB stating, "The entire waste management facility shall be designed, constructed, operated, and maintained to prevent the release and mitigation of any waste, contaminant, or pollutant beyond the point of compliance as defined in 30 TAC 330.2. The landfill is currently polluting the groundwater as evidenced by the Corrective Measures Assessment. Even if remediation activity is beginning to "Clean-up" groundwater, capping of the non-subtitle areas must begin immediately. Please explain why placing an additional 35 million compacted cubic yards of MSW on this landfill will not provide additional infiltration resulting in continued polluting.

5. Clearly the proponent is attempting to circumvent the spirit of Subtitle D by requesting a vertical expansion with 86 percent of the area not having Subtitle D liner. The landfill is projected to close 20 years after Subtitle D implementation. Please explain how TCEQ is protecting the environment by allowing the proponent to vertically expand over a non-subtitle D area with groundwater problems.
6. Please explain where the unfiltered ground water test results are in the amendment. The owner must have been testing unfiltered ground water samples since at least the Corrective Measures Assessment as TCEQ has no authority to issue a filter variance on "assessment constituents," Appendix II to 40 Code of Federal Regulation Part 258.
7. Please explain how the presented equipment dedicated to the McCarty Road Landfill will be capable of handling 6000 tons of waste per day in an environmentally sound manner.
8. The current gas collection and control system is inadequate to control migration of landfill gas. Seven existing gas probes have shown methane levels above the regulatory limit. Please explain why all extraction wells are not being replaced as part of this amendment so that well perforations run the entire thickness of the waste. Also, please explain how placing up to 128 feet of additional waste on the landfill will not negatively impact gas extraction. In addition please explain how much ground water pollution is occurring because of methane migration particularly from "light" organic compounds.

Please place me on the mailing list for this permit amendment. My mailing address is:
P. O. Box 692132, Houston, Texas 77269-2132.

Dear Ms. Castanula:

The purpose of this letter is to express my **OPPOSITION** to the expansion of the landfill owned by BFI/Allied Waste location at 5757 Oats Road off McCarty Road. As a concerned citizen I am **OPPOSED** to the expansion of the landfill because of the health and safety problems it is creating in the northeast community.

I am asking you to support the community's efforts to stop the issuance of a expansion permit by contacting the Texas Commission on Environmental Quality (TCEQ) expressing your support for the community's opposition as well.

Please help us address this problem and return our community to a safe place to live and work.

I need your help and support as soon as possible. I look forward to your response.

Sincerely,

Mae Ayler

Dear Ms. Castanula:

The purpose of this letter is to express my **OPPOSITION** to the expansion of the landfill owned by BFI/Allied Waste location at 5757 Oats Road off McCarty Road. As a concerned citizen I am **OPPOSED** to the expansion of the landfill because of the health and safety problems it is creating in the northeast community.

I am asking you to support the community's efforts to stop the issuance of a expansion permit by contacting the Texas Commission on Environmental Quality (TCEQ) expressing your support for the community's opposition as well.

Please help us address this problem and return our community to a safe place to live and work.

I need your help and support as soon as possible. I look forward to your response.

Sincerely,

Clarence Zenon, Jr.
